

# INSTALLATION MANUAL

## „Interior door”

- If you have to store the door in its carton packaging, store it horizontally
- Do not store interior door in contact with water or constant moisture
- Do not use interior door for outside use or wet room door
- In standard the door is not varnished or painted
- Fixing screws for door frame are not included with package
- Handles are not included with package

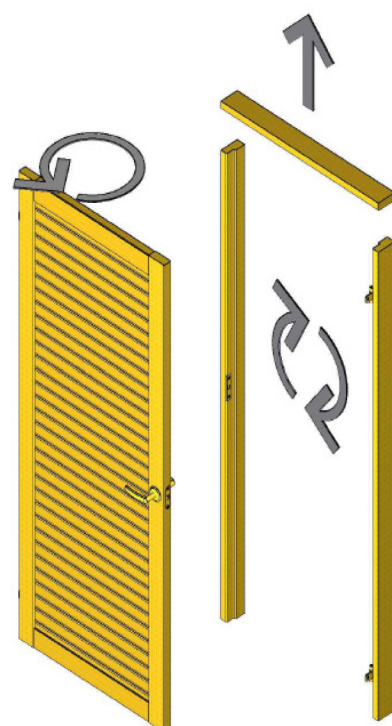

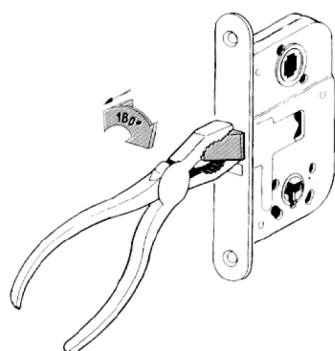

### INSTALLATION OF THE DOOR

1. Take the door out of the package
2. Remove the door panel from door frame (release the hinges)
3. Remove the lower frame detail (it is only for transportation)
4. If necessary change the door opening direction (see below)
5. Place the door frame into the doorway
6. Using spirit level make sure that door frame is placed correctly
7. Fix the door frame with screws and/or installation foam
8. Place the door panel on hinges (adjust the hinges if necessary)
9. Install the door handles (not included with package)

### CHANGING THE OPENING DIRECTION

1. Unscrew the upper jamb of the door and hinges from door panel
2. Change the vertical jambs with each other (turn them around 180°)
3. Turn the door panel so that “inner side” becomes to “outer side”
4. Fix the upper jamb and hinges
5. Pull the tumbler out and turn it around 180°

### MAINTENANCE OF THE DOOR

Make sure that door moves correctly. If necessary regulate the hinges and tighten the screws.
